SUBJECT: **STATUS REPORT ON KEY INDICATORS OF PROGRESS, HOSPITAL OPERATIONS, AND OTHER ISSUES RELATED TO THE TRANSITION TO THE NEW LAC+USC MEDICAL CENTER – PROGRESS REPORT #92**

This is to provide your Board with the monthly report on the status of transitioning to the new LAC+USC Medical Center (LAC+USC). This report is the full monthly operational report with trends to include the month of August 2013.

**Census Trending** (ADC includes Psychiatric & Newborn Patients)

The Average Daily Census (ADC) for the month of August was 550 out of 676 licensed beds, an estimated 80% utilization rate (82% occupancy). The census for Medical/Surgical units was an estimated 91% utilization rate (93% occupancy) for August 2013.

**Emergency Department (ED) Indicators**

The attachment demonstrates an increase in the average daily census (ADC) and ED boarding times. There was a decrease in ED wait times and the rate of patients who left without being seen (LWBS) in comparison with July 2013. The number of patients transferred out increased for this period compared to July 2013. The Dangerously Overcrowding Level Comparison for August 2013 was 14% compared to 4.6% in July 2013.

If you have any questions or need additional information, please contact me or Henry Ornelas, LAC+USC Interim Chief Executive Officer, at (323) 409-2800.

**ED Wait Time:**  
 Measured from time patient is triaged to time patient is either admitted or discharged reported as an arithmetic mean.

**Definition:**  
 Sum of all wait time values during the monthly reporting period divided by the total number of values.

**Source of Data:**

**Target:**  
 No target value.  
 Lower numbers are better.

**2e.  
ED  
Diversion**

**ED Diversion:**

A percentage measure of the time the ED diverts ambulance traffic away from the ED, reported as a function of the reason for diversion on a monthly basis.

**Calculation:**

The total number of hours of ED diversion for a specific reason divided by the total number of available hours in a month.

**Source of Data:**

ReddiNet

**Diversion of ALS Units due to ED Saturation**

**Key points:**

-- Diversion is for paramedic runs only; Basic Life Support ambulances still arrive.  
 -- When diversion is requested but all hospitals in the area are on diversion, patients go to the closest hospital. Therefore, ambulances often arrive while "on diversion".
